Subject: **Second Groundwater Monitoring Event
Community Within the Corridor – East Block
2748 N. 32nd Street, Milwaukee, WI 53210
BRRTS #: 02-41-263675; FID #: 241025400**

Dear Ms. Dorman:

On behalf of the Community Within the Corridor Limited Partnership (CWC), K. Singh & Associates, Inc. (KSingh) is pleased to submit the results of a second round of groundwater results of the above referenced site. A site location map is on Figure 1 and the monitoring well locations are presented on Figure 2.

Two groundwater monitoring wells were damaged during construction of the facility. MW-4 was a stickup well which was snapped off at the ground surface sometime in August 2021, and properly abandoned in accordance with NR 141. Documentation of the abandonment of MW-4 was presented in the SIR dated November 2, 2021. In addition, MW-2 was damaged as the flushmount protective pipe cover had one bolt bent and the other two were stripped. This was noticed during a site visit on November 12, 2021. MW-1 has been dry since its installation back in May 5, 2021.

The replacement well (MW-4R) was installed November 29, 2021. The soil boring log, monitoring well construction form and development forms are presented in Attachment A. The location of MW-4R is shown on Figure 2.

Groundwater sampling was conducted for four (4) of the six (6) monitoring wells on November 12, 2021 (MW-5 and MW-6), November 29, 2021 (MW-3) and December 14, 2021 (MW-4R). These wells were sampled for the following parameters.

Well ID	VOCs	SVOCS	PAHs	Metals	Pesticides	Herbicides
MW-3	X	1		1	1	1
MW-4R	X	X		X	1	1
MW-5	X		X	X		
MW-6	X		X	X		

Note: X – sampled and, 1 - not enough water to sample.

Prior to groundwater sampling, depth to water was measured in each monitoring well using a water level indicator and measuring from top of PVC casing. Nomenclature of Soil Probes and Monitoring Wells is summarized in Table 1 and Groundwater Elevation Data is summarized in Table 2. Groundwater is flowing to the west / northwest.

Groundwater samples were collected in accordance with the WDNR's Groundwater Field Sampling Manual following purging and preserved on ice. The groundwater samples were submitted to Eurofins - Test America, Inc., University Park, Illinois using proper chain-of-custody procedures. Chain of Custody records and laboratory groundwater quality analytical results are included in Attachment B. Groundwater quality test results are summarized in Table 3.

On the November 12, 2021 sampling event, NR 140 Preventative Action Limits (PALs) exceedances (0.50 ug/l standard) included Methylene Chloride (MC) in monitoring wells MW-5 and MW-6. The MC concentrations had a "J" flagged value. The result is less than the reporting limit but greater than or equal to the method detection limit and the concentration is an approximate value. MC is a common laboratory artifact and was detected in the Trip Blank sample indicating laboratory contamination. Therefore, we conclude that MC is not present in groundwater. There were no PAHs exceeding the NR 140 PALs in both MW-5 and MW-6. Arsenic was exceeding the NR 140 PAL of 1 ug/l at 1.6 ug/l in MW-6 and selenium was exceeding the NR 140 PAL of 10 ug/l at 26 ug/l in MW-5, but was below the NR Enforcement Standard (ES) of 50 ug/l.

On the November 29, 2021 sampling event, a NR 140 PAL exceedance (85 ug/l standard) included 1,1-Dichloroethane at MW-3 but was below the NR 140 ES of 850 ug/l. In addition, MW-3 included cis-1,2-Dichloroethene at 340 ug/l and Trichloroethene at 26 ug/l greater than NR 140 ES's of 70 ug/l and 5 ug/l, respectively. VOCs in MW-3

On the December 14, 2021 sampling event, there were no exceedances of VOCs above the laboratory's method detection limits in MW-4R. Of the SVOCs Pentachlorophenol (PCP) was at 1,000 ug/l which exceeded the NR 140 ES of 1 ug/l. PCP has uses as insecticides, algicides, herbicides, fungicides and bactericides; and wood preservatives and its source is railroad operations. There were no NR 140 PAL of ES exceedances of the RCRA metals.

No NR 140 ES exceedances are present in the southern portion of the property where manufacturing took place except for PCP in MW-4R related to the railroad. Given that the groundwater table in monitoring well MW-6 within the building is 21 feet below ground surface, soil contamination appears confined to the top four feet below the building, and the building protects interior soil contamination from infiltration, the source of groundwater ES exceedances appears solely related to the former underground storage tanks (BRRTS file # 02-41-263675) on the northern end of the property and the railroad.

A brief comparison of the former chemicals of concern from the former BRRTS #: 03-41-000793 (Jonas Construction – Closed LUST) was performed of the historic MW-2 and the current MW-2 which are/were installed in the same general area within the northern courtyard. The table following shows the relationship between then and now.

Well ID:	Former MW-2	Former MW-2	Current MW-2	
Chemical Parameters	Former Range 2003-2006 (ug/l)	Average 2003-2006 (ug/l)	Newer 2021 (ug/l)	Difference
Tetrachloroethene	<1.0 to <12.5	<5.2	1	Same
Trichloroethene	2.9 to 7.6	4.5	11	Higher
Cis-1,2-Dichloroethene	8.65 to 822	193.1	66	Lower
Benzene	1.59 to 292	78	57	Lower
Ethylbenzene	<6.0 to 118	50.3	160	Higher
Trimethylbenzene	37.9 to 793	196	500	Higher
Naphthalene	<160 to 22	16.3	31	Higher

The comparison demonstrates a mix (decreasing/increasing/same) within the data from MW-2. However, the test results are comparable.

In summary, based on one to two groundwater sampling events, KSingh has made the following conclusions and recommendations:

- MW-2 has been impacted with PVOCS, CVOCs and PAHs which is residual groundwater contamination from the previous BRRTS files.
 - 03-41-000793 (Jonas Construction – Closed LUST), this case was opened on June 8, 1990, and was closed on February 14, 2007, with continuing obligations, and
 - 02-41-263675 (Formerly Wisconsin Industries Pension & Trust) in which this case was opened on January 11, 2001 and was closed on August 26, 2008 with continuing obligations.
 - A comparison between MW-2 from then and now shows a mix (decreasing/increasing/same) of data.
- MW-3 detected CVOCs at concentrations over the NR140 PAL and ES and which will require additional monitoring. The source of contamination in MW-3 is related to BRRTS file # 02-41-263675 (Formerly Wisconsin Industries Pension & Trust).
- MW-4R detected pentachlorophenol (PCP) exceeding the NR 140 ES which is located on the eastern portion of the site adjacent to the Railroad Right-of-Way. PCP is a localized railroad-based contaminant.
- MW-5 and MW-6 identified selenium and lead exceedance above the NR 140 PAL, but below the NR 140 ES. As concentrations of metals are between the NR 140 PAL and NR 140 ES, KSingh plans on pursuing an exemption request pursuant to NR 140.28.
- The CVOC groundwater impacts remain confined to the northern one-third of the subject property and the southern two-thirds of the subject property have been free of CVOC which is consistent with the SIR groundwater data. CVOCs are related to BRRTS file # 02-41-263675 (Formerly Wisconsin Industries Pension & Trust).
- No NR 140 ES exceedances have been detected that are related to former industrial operations on the southern two-thirds of the site.
- KSingh recommends one more round of groundwater sampling for the Spring of 2022. Additional monitoring will be assessed after reviewing the data. In addition, to the SIWP sampling parameters for groundwater; Polychlorinated Biphenyls (PCBs) and 1,4-dioxane in all wells and Per- and poly-fluoroalkyl substances (PFAS) in MW-6 will be added to the list of parameters.

Please contact us if you have any questions.

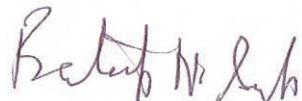

Sincerely,
K. SINGH & ASSOCIATES, INC.

Notes:

Italics = Exceeds NR 140 Preventive Action Limits (PAL)

Bold = Exceeds NR 140 Enforcement Limits (ES)

--- No Established Standards

* = The combined total of 1,2,4 and 1,3,5-TMB

*+ = LCS and/or LCSD is outside acceptance limits, high biased

*- = LCS and/or LCSD is outside acceptance limits, low biased

J = Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value

B = Compound was found in the blank and sample

Methylene Chloride present in EB-MW-2 and EB-MW-5 is a lab artifact, indicated by a detection in the 7/20/2021 trip blank

1 - Incorrectly labeled in the analytical lab report as EB-B-17/MW-2

2 - Dup-1 is of MW-6

The test results in this report meet all 2003 NELAC, 2009 TNI, and 2016 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

Comments

No additional comments.

Receipt

The samples were received on 11/13/2021 9:50 AM. Unless otherwise noted below, the samples arrived in good condition, and where required, properly preserved and on ice. The temperature of the cooler at receipt was -0.4° C.

GC/MS VOA

Method 8260B: Methylene chloride was detected in the following samples: MW-5 (500-208388-1), MW-6 (500-208388-2), Dup-1 (500-208388-3) and Trip Blank (500-208388-4). The method blank associated with these samples was below the reporting limit for Methylene chloride. Methylene chloride is a known lab contaminant; therefore all low level detects for this compound could be suspected as lab contamination.

Method 8260B: The laboratory control sample (LCS) for 629266 recovered outside control limits for Chloroethane. This analyte was biased low in the LCS and was not detected in the associated samples; therefore, the data have been reported. MW-5 (500-208388-1), MW-6 (500-208388-2), Dup-1 (500-208388-3) and Trip Blank (500-208388-4)

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC/MS Semi VOA

Method 8270D: Perylene-d₁₂ Internal standard (ISTD) response for the following samples were outside of acceptance limits: MW-5 (500-208388-1) and MW-6 (500-208388-2). Analytes associated to this internal standard were non-detect; therefore, re-analysis was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
*-	LCS and/or LCSD is outside acceptance limits, low biased.
F1	MS and/or MSD recovery exceeds control limits.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC/MS Semi VOA

Qualifier	Qualifier Description
*3	ISTD response or retention time outside acceptable limits.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Metals

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation These commonly used abbreviations may or may not be present in this report.

□	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Question

Answer

Comment

Radioactivity wasn't checked or is </= background as measured by a survey meter.

True

The cooler's custody seal, if present, is intact.

True

Sample custody seals, if present, are intact.

True

The cooler or samples do not appear to have been compromised or tampered with.

True

Samples were received on ice.

True

Cooler Temperature is acceptable.

True

Cooler Temperature is recorded.

True

-0.4 Samples not frozen

COC is present.

True

COC is filled out in ink and legible.

True

COC is filled out with all pertinent information.

True

Is the Field Sampler's name present on COC?

True

There are no discrepancies between the containers received and the COC.

True

Samples are received within Holding Time (excluding tests with immediate HTs)

True

Sample containers have legible labels.

True

Containers are not broken or leaking.

True

Sample collection date/times are provided.

True

Appropriate sample containers are used.

True

Sample bottles are completely filled.

True

Sample Preservation Verified.

True

There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs

True

Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").

True

Multiphasic samples are not present.

True

Samples do not require splitting or compositing.

True

Residual Chlorine Checked.

N/A

Laboratory: Eurofins TestAmerica, Chicago

Narrative

**Job Narrative
500-209013-1**

Comments

No additional comments.

Receipt

The samples were received on 11/30/2021 10:40 AM. Unless otherwise noted below, the samples arrived in good condition, and where required, properly preserved and on ice. The temperature of the cooler at receipt was 2.5° C.

GC/MS VOA

Method 8260B: Methylene chloride was detected in the following samples: Trip Blank (500-209013-2). The method blank associated with these samples was below the reporting limit for Methylene chloride. Methylene chloride is a known lab contaminant; therefore all low level detects for this compound could be suspected as lab contamination.

Method 8260B: The following sample was diluted to bring the concentration of target analytes within the calibration range: EB-MW-3 (500-209013-1). Elevated reporting limits (RLs) are provided.

Method 8260B: The method blank for 632466 contained Toluene and Xylenes, Total above the method detection limit. This target analyte concentration was less than the reporting limit (RL); therefore, re-extraction and/or re-analysis of samples was not performed.(MB 500-632466/6)

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	2.5
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

The test results in this report meet all 2003 NELAC, 2009 TNI, and 2016 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

Comments

No additional comments.

Receipt

The samples were received on 12/15/2021 10:40 AM. Unless otherwise noted below, the samples arrived in good condition, and where required, properly preserved and on ice. The temperature of the cooler at receipt was 1.7° C.

Receipt Exceptions

Did not receive a preserved bottle for metals - lab filtration required.

GC/MS VOA

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

GC/MS Semi VOA

Method 8270D: The laboratory control sample (LCS) for preparation batch 500-634185 and analytical batch 500-634865 recovered outside control limits for the following analytes: 4-Chloroaniline and 4-Nitroaniline. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

Method 8270D: The RPD of the laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for preparation batch 500-634185 and analytical batch 500-634865 recovered outside control limits for several analytes. No corrective action was required.

Method 8270D: The following sample required a dilution due to the nature of the sample matrix: MW-4R (500-209778-1). Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals

Method 6020A: The method blank for preparation batch 500-634526 and 500-635936 and analytical batch 500-636088 contained Barium (Ba) and Lead (Pb) above the reporting limit (RL). Associated sample(s) were not re-extracted and/or re-analyzed because results for Ba were greater than 10X the value found in the method blank and Pb was non-detect.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Organic Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Qualifiers

GC/MS Semi VOA

Qualifier	Qualifier Description
*+	LCS and/or LCSD is outside acceptance limits, high biased.
*1	LCS/LCSD RPD exceeds control limits.
D	Surrogate or matrix spike recoveries were not obtained because the extract was diluted for analysis; also compounds analyzed at a dilution may be flagged with a D.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Metals

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation

These commonly used abbreviations may or may not be present in this report.

¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	1.7
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A
